Yuch'ih Substation
Yuch'ih Black Tea Substation was originally established in 1936. It was reorganized as Yuch;ih Substation of the TTES in 1968. The substation is responsible for the research and extension of middle high altitude tea fields and also for black tea experiments in Taiwan.
Wenshen Substation
Established in 1930 , the substation was originally named Tea Training School. In 1968 , the substation was reorganized as Lin-kou Substation of the TTES. After the movement to Shihding , Taipei , the station is called as Wenshan Substation , an important research and extension center for promoting Paochong tea in Northern part of Taiwan.
Taitung Substation
The substation was established in 1983 at Luyeh , Taitung. It is the center of experimentation and extension for the development of tea industry East Taiwan.
Tungding Substation
The substation was initiated in 1985 for the research and development of tea production in Tungding and its adjacent areas.
